Definitely a hardworking and quick learner.

EXPERIENCE

Intern (Laravel Developer) — Tinkune, Kathmandu

Creatu Developers — Feb, 2022 - Apr, 2022

During this period of time, I have worked on multiple projects such as creating blog posting websites and fixing bugs on real world projects.

Laravel Developer — Kathmandu

Whetstone Associates — Aug, 2022 - Present

- Currently, I'm working as a Laravel developer at Whetstone Associates, specializing in ERP (Enterprise Resource Planning) systems. My primary focus lies in the development of the Accounts and Inventory modules, which are integral parts of the ERP system.
- In the Accounts module, I design and implement functionalities for managing financial transactions, including the creation and processing of vouchers. I ensure that the system efficiently handles tasks such as generating invoices, recording payments, tracking expenses, and maintaining accurate financial records. Additionally, I work on incorporating features that support financial reporting and analysis.
- Within the Inventory module, my expertise lies in developing robust solutions to manage warehouse operations. This involves designing and implementing functionalities to handle inventory management, stock tracking, and order fulfillment.
- In my role, I actively participate in requirements gathering, contribute to system design discussions, and provide technical expertise throughout the development lifecycle.
  Overall, my goal is to create a comprehensive ERP system that effectively manages the Accounts and Inventory modules, empowering businesses with accurate financial data, streamlined warehouse operations, and enhanced decision-making capabilities.
